 Player 2: _____ Army: _____

Victory Points

Calculate Victory Points for missions which use victory Points. A victory by a number of points equal to or less than $\frac{1}{4}$ the number of points played counts as a draw. Mission Objectives may override this rule. Examples: $1500 / 4 = 375$ pts
 Common totals: $1000 = 250$ $1500 = 375$ $1700 = 425$ $2000 = 500$

Conditions	Victory Points
Each enemy unit/vehicle destroyed, fleeing, or having fled the table	VP = points value of the unit
Each individual enemy unit reduced to 50% of its models, vehicles immobilized or weapons destroyed, or individual models with more than one wound reduced by 50%	VP = 50% value of unit
Successfully completing additional mission objectives if any	VP = As defined by Mission Objectives
